

SEAL Systems Integration for SAP® Records Management

RM RECORD2GO

OUTPUT OF DOCUMENTS CONTAINING RECORDS/CASE STRUCTURES AS PDF

// SAP Records Management offers an ideal possibility to structure, to administrate and to edit documents and business objects online.

There are business processes, for which an offline usage of records or parts of them is eligible: Record2go from SEAL Systems enables the generation and entrainment of documents of a record in PDF format. Therewith the structure of the records are traceable.

Using a defined set of rules or by interactive selection methods the necessary or referenced contents are identified and marked.

The collection process is started with a context menu or by using a button in the head area of the record.

EXAMPLES FOR USAGE

Estate record – Generation and attachment of descriptions of real estate objects

Machine record – Output of partial documentation for admission procedures or maintenance

Personnel record – Selective document provision for appraisal interviews

Customer – All relevant customer data for the sales office

Product information – Data for prototyping and sales office talks

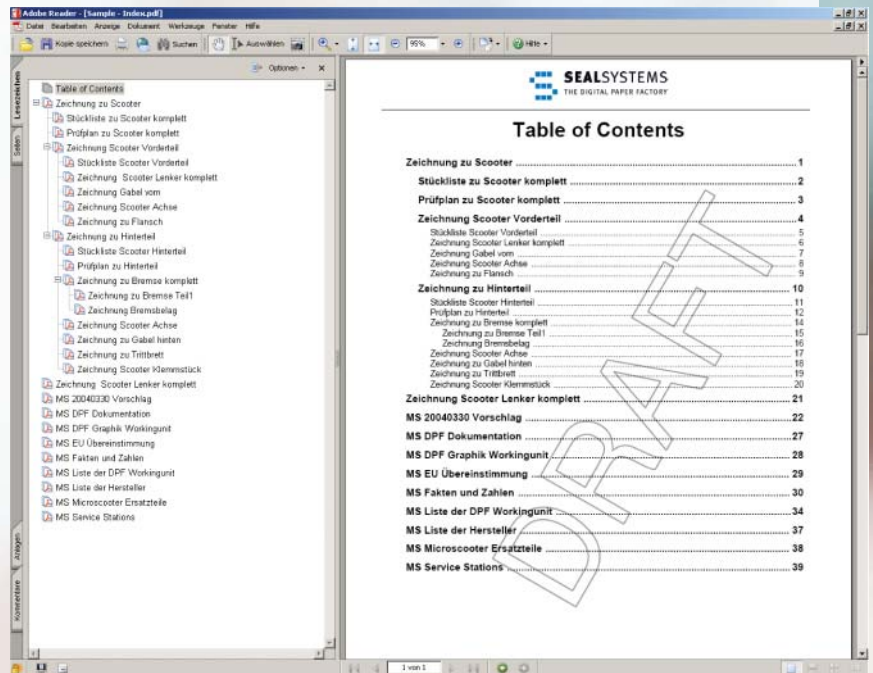

Baselining – Freezing of record contents for documentation and backup

RM Record2go

The next step is the preparation of the collected documents into a customer-specific and manageable PDF document.

All partial documents are combined to a new complete document. New headers and footers, page numbering, contents, document distribution information and navigation elements are added.

These procedures are implemented with the unique DPF technology from SEAL Systems: The conversion and formatting processes are configurable according to customer needs and task specific requirements.

FUNCTIONALITY

- Selective output of relevant documents
- Assembly of selected partial documents to a new complete document
- Application of annotations, lock flags, water marks
- Automated formatting/layout
- Adding of navigation elements within the complete document (bookmarks)
- Output as electronic document or print
- Individual configuration of the publishing workflow

DISTRIBUTION

- Print, eMail, CD/DVD, WEB portal, file

BENEFIT

- Mobile access to SAP RM documents
- Security and compliance through reliable status of records
- Improved providing of information by offline availability of SAP RM information
- High user acceptance through comfortable handling

TECHNOLOGY

- RM Transaction via SAP GUI and RFC calls, interface BC-XDC
- Publishing via Digital Process Factory® DPF from SEAL Systems

INPUT FORMATS

- Neutral formats: PDF, TIFF
- Office formats: Word, Excel, PowerPoint, Visio, MS Project
- Publishing formats: Corel-Draw, FrameMaker
- CAD formats: AutoCAD, SolidWorks, SolidEdge, Inventor, UG, Catia, ME10, Pro/E
- Graphic formats: HPGL, HP-RTL, GIF, JPEG, PostScript, CGM and many more.

OUTPUT FORMATS

- PDF or PDF/A

LICENSING

- Each publishing server and SAP RM system
